SUMMARY

I am a Flutter developer with 1.5+ years of experience in creating and delivering high-quality mobile applications. I have proficiency in various programming languages and frameworks, such as Dart and Java. I can work independently or collaboratively, depending on the project requirements. I have excellent problem-solving skills and a dedication to meet the deadlines and budget constraints. I deliver quality apps that meet the expectations of the clients and the users.

EXPERIENCE

DOLLOP INFOTECH PVT LTD   04/2022 - Present

I have 1.5+ years of IT experience in developing and designing mobile applications using Flutter framework.

- I am an expert in object-oriented programming languages, with the ability to create efficient and robust solutions for various problems using modular and reusable code.
- I can work effectively in a team or independently, as well as lead and mentor junior developers.
- Driven to make a positive impact on any project and to overcome challenges and exceed expectations.
- Good skills in developing, maintaining, and debugging high-quality code
- Developed cross-platform apps using flutter for Android and IOS.
- Collaborated with project managers, designers, and developers to deliver projects on time and within budget. And worked with QA team to identify and fix bugs in code
- Used third-party libraries, custom libraries and APIs to develop new applications

2021 - 2022

M.P. Board, XII

Abhigyan School, Sanawad.

2019 - 2020

CBSE Board, X

Nirmal Vidhyapeeth School, Barwaha.

PROJECTS

- **ECOMMERCE APP –** Allows users to browse, select, and purchase products or services online. It usually has features such as add to cart, buy now, checkout, payment, delivery, etc.

- **ZEROCART –** An e-commerce application with outfit room and measurement customization features is an application that allows users to buy clothes online and try them on virtually. Users can use this application on dark and light mode.

- **ZEROCART DELIVERY –** It provides features such as payment, tracking, delivery confirmation, feedback, etc.

- **PGMS –** A grievance management system application that allows users to report, track, and resolve their grievances or complaints related to various issues, such as service quality, product defects, employee behaviour, etc. It provides features such as grievance submission, status update, escalation, feedback, etc.

- **DESIGNER CHOWK –** A newspaper application that allows users to read the latest news from various sources and categories online.

- **QUIZ APP –** A quiz application that provides study material and mock tests for students' preparation and allows users to use portrait or landscape mode as well.

- **GOFINX –** I work on this app to maintain and enhance its features, such as firebase dynamic linking, that provide valuable services to the users.

- **LUCCKY DROW –** This application lets you try your luck by selecting and paying for any contest that interests you. When the contest is full, a lucky number is generated by the admin and the winner gets the prize money. You can also view the past and upcoming contests and track your winnings.

- **TAXI DRIVER –** This application connects you with reliable and professional drivers who can take you to your destination safely and comfortably. You can book a ride in just a few taps, choose your preferred payment method, and track your driver's arrival.
